Details:

The ER physician group at **Barnes Jewish Hospital** is creating a brand-new scribe program for their physicians. They have contracted our company ScribeAmerica to hire and train their scribes. Accordingly, we are recruiting outstanding students interested in careers in medicine to begin staffing their program. Our company is the largest scribe company in the United States and we staff over 1,000 sites across 48 states.

The job opportunity is called a "Medical Scribe." We act as personal assistants to the physician and perform all of their non-patient-care tasks. These include documentation, patient tracking, organization, and much more. We are looking for extremely motivated, sharp, and adaptable students who perform well in a fast-paced and high-energy environment. Because you will work one-on-one with a board certified physician for the entirety of their shift you become intimately familiar with medicine. It is extremely exciting work; you see everything from cardiac arrest, to strokes, gunshot wounds, and much more. Additionally, you gain first-hand experience documenting exactly like a physician; a skill that is invaluable later for any career in health.

There is both theoretical classroom training and applied training live on the hospital floor. Because of the rigors of training, all hours spent training are paid. Both time in the classroom and time on the hospital floor are compensated. After training, shifts last 8-9 hours each, and we ask for a minimum of two shifts per week. Additionally, since we personally commit over 100 hours of training for each employee, there is verbal commitment of two years of work. The training starts at \$8.00 per hour, and raises to \$10.00 per hour after you have proved your ability to work independently. Additionally, we are looking to hire a chief scribe and trainers to run the program at this hospital so career opportunities are available for noteworthy candidates.

There are few other opportunities that allow for such direct exposure to the physician medical decision making process: and this opportunity is paid. This job is one of a kind; those who have excelled as scribes have consistently progressed to have successful careers in medicine. If you especially impress a physician, they will be happy to provide a strong letter of recommendation for medical school. Additionally, the medical terminology acquired during your time as a scribe will put you leagues above your other classmates later in school.
